CONFIDENTIAL — This document contains proprietary information.

1.0 Executive Summary

OrbitAvanya Tech LLP understands the National Weather Service's requirement for comprehensive landscaping and grounds maintenance services at the Weather Forecast Office in Jackson, Mississippi. This 5-year firm-fixed-price contract (base year plus four option years) encompasses approximately 3,000 square feet of diverse grounds—including lawns, native grass areas, gravel surfaces, plant beds, parking lots, walkways, driveways, and curbs—along with the specialized maintenance of the secured Upper Air Building area requiring escorted access.

Mission Understanding & Critical Success Factors

The NWS mission depends on uninterrupted, professional facility operations. Grounds maintenance directly supports this mission by ensuring safe, accessible, and well-manicured exterior environments for staff, visitors, and critical infrastructure. The critical success factors for this contract are:

- **Schedule Adherence:** Executing a variable frequency schedule (weekly April–September, biweekly March/October–December, monthly January–February) coordinated with the Meteorologist in Charge (MIC), including seasonal chemical applications (fertilizer in May, weed control in March/June, fire ant control as needed) and pruning/mulching cycles (March/June).
- **Regulatory Compliance:** Full adherence to SCA Wage Determination 2015-5153 Rev 30 (Laborer, Grounds Maintenance WG3 at \$15.71/hr + \$20.42/hr fringe), FIFRA regulations, Mississippi pesticide applicator licensing, OSHA Hazard Communication (SDS management), and NOAA-mandated training (sexual assault/harassment prevention within 30 days of assignment, annually by March 1).
- **Secured Area Protocol:** Reliable coordination with NWS escorts for all work within the Upper Air Building's fenced perimeter, ensuring zero security incidents.
- **Documentation Rigor:** Monthly invoicing in arrears via IPP with signed physical service tickets for every visit, PO-number traceability, and immediate reporting of ground defects, plant diseases, or infestations to the MIC.
- **Quality Assurance:** Re-performance of non-conforming services at no cost, with price adjustments for uncorrectable defects, per the Government's inspection rights.

Value Proposition

OrbitAvanya Tech LLP brings a disciplined, compliance-first approach to federal service delivery. While our core portfolio centers on IT and software services, we recognize this requirement demands specialized horticultural expertise, licensed chemical applicators, and dedicated grounds crews—capabilities we do not currently maintain in-house. Our value proposition for this procurement is transparent: we are not positioned to self-perform the technical scope. Instead, we would pursue a prime-subcontractor partnership with an SBA-certified small business landscaping firm that holds the required Mississippi pesticide applicator licenses, demonstrates two completed similar projects within the past three years, and maintains a trained WG3 labor force compliant with the applicable wage determination. As prime, OrbitAvanya would provide contract administration, IPP-compliant invoicing systems, federal compliance oversight (SAM/FedConnect registration, SCA fringe tracking,

EO 13706 sick leave accrual, holiday observance), and a single point of accountability to the Contracting Officer and COR.

Personnel Commitment & Scalability

Should a teaming arrangement be formalized, OrbitAvanya commits to retaining a dedicated Contract Manager as Key Personnel for the full 5-year period, ensuring continuity of Government communication, schedule coordination with the MIC, and rapid issue resolution. Our management structure supports rapid scalability of administrative oversight—should option years be exercised or scope adjustments arise—while the subcontractor partner would maintain the necessary field crew depth to meet the variable mowing schedule and seasonal application windows without interruption.

Conclusion

OrbitAvanya Tech LLP respects the NWS's requirement for a technically acceptable, lowest-priced offeror. We acknowledge the mandatory Technical Capability pass/fail gate—specifically the requirement for two completed similar projects within three years and proof of state-certified applicators with the offer—and would only submit a proposal backed by a fully qualified landscaping partner meeting every technical criterion. Our commitment is to deliver a compliant, administratively seamless partnership that allows the NWS to focus on its forecasting mission while grounds maintenance proceeds on schedule, on specification, and in full regulatory compliance.

2.0 Technical Approach & Methodology

Overview

OrbitAvanya Tech LLP understands the National Weather Service (NWS) requires comprehensive, reliable grounds maintenance for the Weather Forecast Office (WFO) in Jackson, MS. Our technical approach is structured around the six core service areas defined in the Statement of Work (SOW), integrated with a compliance-first framework that addresses all regulatory, safety, and documentation requirements. The methodology emphasizes consistent execution per the prescribed monthly frequency schedule, proactive coordination with the Meteorologist in Charge (MIC), and rigorous adherence to Service Contract Act (SCA) wage determinations and federal environmental standards.

1. Mowing & Edging — Execution Methodology

Scope Alignment: Approximately 3,000 SQFT covering lawns, semi-improved areas, and native grass zones, plus all sidewalk, driveway, curb, and concrete/asphalt border edging including vegetation removal from pavement cracks.

Crew Deployment & Equipment:

- Two-person crew minimum per visit (one operator, one edging/trim specialist)
- Commercial-grade rotary mowers (21–36 in. deck) with mulching kits; string trimmers for perimeter work; powered edgers for hard-surface borders
- Equipment maintained per manufacturer schedules; blades sharpened weekly during peak season (Apr–Sep)

Visit Protocol (per SOW Schedule):

Month(s)	Frequency	Crew Hours per Visit (est.)	Key Actions
Jan–Feb	Monthly (1×)	1.5–2.0	Mow at 3–3.5 in. height; edge all hardscapes; remove crack vegetation
Mar, Oct–Dec	Biweekly (2×)	1.5–2.0	Same as above; monitor native grass growth rates
Apr–Sep	Weekly (4–5×)	1.0–1.5	Mulch clippings unless visible accumulation requires removal; edge every visit

Quality Controls:

- Post-mow walk-through by crew lead using checklist: grass height uniformity, clipping management, edge crispness, crack vegetation clearance

- Photographic documentation (geotagged, timestamped) uploaded to shared drive for MIC review upon request
- Re-performance trigger: any area exceeding 4 in. height or visible clippings on hardscapes after crew departure

To be discussed: Exact crew size optimization after site walk; equipment staging/storage options on-site.

2. Grass & Weed Trimming — Integrated Technique

Scope Alignment: Trimming around all fixed obstacles — trees, shrubs, buildings, fences, poles, fire hydrants, parking bumpers, boulders — with damage repair obligation.

Method:

- String trimmers with guard attachments; hand shears for delicate plant material
- Trimming height matched to adjacent mowed turf (3–3.5 in.)
- Obstacle protection: trunk guards on young trees; manual trimming within 12 in. of woody stems
- Damage protocol: immediate photographic report to MIC; certified arborist consultation for structural damage; replacement at contractor expense per SOW

Scheduling: Performed concurrently with every mowing visit — no separate mobilizations.

To be discussed: Inventory of obstacle types and counts on-site; preferred trunk guard specifications.

3. Debris Removal & Grounds Policing — Systematic Process

Scope Alignment: Litter patrol (natural and manmade) with offsite disposal; post-visit clearing of all hardscapes (sidewalks, parking lots, driveways, concrete flat-work) of clippings, bark, dust, dirt.

Visit Workflow:

- Pre-mow walk: remove large debris (limbs, brush, dead animals) — bagged for offsite disposal at licensed facility
- Post-mow/trim: powered blowers clear clippings, dust, bark from all hardscapes; hand sweep corners and expansion joints
- Final inspection: crew lead verifies zero visible debris on any paved surface

Disposal Compliance:

- Green waste: Jackson municipal compost facility (or approved alternative)
- Manmade litter: permitted solid waste transfer station
- Dead animals: handled per Mississippi Department of Health guidelines; PPE mandatory; incident logged and reported to MIC same day

To be discussed: Approved disposal facility confirmations; dead animal reporting form template.

4. Chemical Applications & Weed Control — Regulatory-First Program

Scope Alignment:

- Fertilizer: annual May application to all lawns, shrubs, plants, ground cover per manufacturer label
- Weed control: chemical treatment twice yearly (March, June) across lawns, native grass, beds, gravel
- Fire ant control: as needed in lawns and flower beds

Compliance Framework:

Requirement	Our Approach
FIFRA (7 USC 136)	All applicators hold current Mississippi Commercial Pesticide Applicator License (Category 3A — Ornamental & Turf); license copies submitted with offer
State certification	Mississippi Department of Agriculture & Commerce (MDAC) certification verified annually; continuing education units (CEUs) tracked
Product standards	Non-toxic, biodegradable, renewable-source products only; petroleum-based synthetics excluded
SDS & approval	Full product list with SDS submitted to MIC/ASA ≥14 days before first application; no product used without written approval
Recordkeeping	FIFRA-compliant application logs (date, time, product, rate, weather, applicator, location) maintained on-site and digitally; available for inspection

Application Protocols:

- Fertilizer (May): Slow-release N-P-K formulation matched to soil test; broadcast spreader calibrated per 1,000 SQFT; irrigation coordination with MIC if needed
- Pre-emergent herbicide (March): Applied before soil temps reach 55°F; granular or liquid per label
- Post-emergent herbicide (June): Spot treatment only; shielded sprayers to protect desirable plants
- Fire ant: Individual mound treatment with approved bait/insecticide; broadcast only if infestation threshold exceeded (per MIC direction)

To be discussed: Soil test results (if available); NWS-approved product list; MIC preference for granular vs. liquid formulations; fire ant action threshold definition.

5. Pruning & Mulching — Seasonal Precision

Scope Alignment:

- Pruning/shaping: all plants, shrubs, trees twice yearly (March, June)
- Mulch/pine straw replacement: all flower beds annually (March)

Pruning Methodology:

- ANSI A300 standards; ISA Certified Arborist supervision for tree work >12 ft or structural pruning
- March: Dormant-season structural pruning — remove dead/diseased/crossing branches; shape for form and clearance
- June: Growth-season maintenance — pinch back, light shaping, water sprout removal
- All cuts clean, at branch collar; no topping; wound dressings not used per current best practice

Mulch Program:

- Material: Pine straw (preferred for native aesthetic) or double-shredded hardwood mulch — per MIC selection
- Depth: 2–3 in. settled; pulled back 3 in. from woody trunks
- Old mulch: Raked out and removed (not layered over) to prevent root rot and pest harborage
- Quantity estimate: To be determined after bed measurement during site walk

To be discussed: Plant species inventory; MIC mulch material preference; bed square footage for quantity calculation; arborist scheduling for March structural prune.

6. Upper Air (U/A) Building Secured Area — Escorted Operations

Scope Alignment: Mow and weed-trim within 10 ft of U/A Building, leading sidewalk, asphalt pads, and inside secured fenced area. All personnel escorted by NWS staff at all times inside secured area.

Coordination Protocol:

- 72-hour advance notice to MIC for each secured-area visit (aligned with mowing schedule)
- Escort request includes: date, time window, crew names, equipment list
- Crew briefing pre-entry: safety rules, no-photography policy, emergency egress, escort stay-within-arm's-reach requirement
- Equipment: Push mowers and battery trimmers only (no ride-on) inside fence; fuel cans left outside secured perimeter
- Post-visit: Escort signs service ticket; crew lead confirms area condition with escort

Contingency: If escort unavailable on scheduled day, MIC notified immediately; visit rescheduled within 48 hours; documented on service ticket.

To be discussed: Escort availability calendar; background check requirements for crew; badge issuance timeline; exact secured-area dimensions and gate access procedure.

7. Regulatory Compliance & Certifications — Integrated Management

Licenses & Permits (maintained current, copies on-site):

- Mississippi Commercial Pesticide Applicator License (Category 3A) — all applicators
- Mississippi Business License — OrbitAvanya Tech LLP
- City of Jackson Occupational License — grounds maintenance

- EPA Firm Certification (if required for lead-safe work near pre-1978 structures) — To be discussed

Environmental Standards:

- Product screening: OMRI-listed or EPA Safer Choice labeled where available; zero petroleum-derived active ingredients
- Spill prevention: Secondary containment for all chemical transport; spill kits on each vehicle; SDS binder in truck and on-site
- Pollinator protection: No neonicotinoid applications; bloom-time restrictions observed per label and EPA guidance

Documentation Package (submitted with offer):

- Applicator license copies
- Product list with SDS
- Insurance certificates (GL, Auto, Workers' Comp per SCA)
- SAM.gov registration confirmation
- FedConnect registration confirmation

To be discussed: Specific City of Jackson permit requirements; EPA firm certification applicability; insurance limit expectations.

8. Personnel Supervision, Safety & Training — Accountability Structure

Supervision Model:

- **Site Supervisor (full-time on every visit):** Oversees all operations; enforces discipline; single point of contact for MIC; conducts pre-job safety briefing; performs post-visit quality walk
- **Backup Supervisor:** Designated alternate with same qualifications; rotates quarterly for continuity

Personnel Standards:

- All field staff: E-Verify confirmed; background check per NOAA requirements (To be discussed: NACI/Tier 1 level)
- Drug-free workplace: Pre-employment, random, post-incident testing per 41 USC 8102
- Immediate removal: Any employee MIC deems unsatisfactory replaced within 24 hours

Mandatory Training (tracked in LMS, certificates to COR/CO):

Training	Timeline	Evidence
NOAA Sexual Assault/Sexual Harassment Prevention	Initial ≤30 days post-award/assignment; Annual by March 1	Completion certificate
OSHA Hazard Communication (HazCom)	Before first chemical handling	Certificate
Pesticide Applicator CEUs	Per MDAC renewal cycle	License renewal

Heat Illness Prevention	Annual (pre-summer)	Attendance roster
First Aid/CPR/AED	Biennial	Certification cards

Safety Reporting:

- Ground defects (trip hazards, erosion, irrigation leaks), plant diseases, insect infestations: verbal to MIC same day; written report with photos within 24 hours
- Near-miss/incident: OSHA 300 log; MIC notified within 2 hours; root cause analysis within 5 business days

To be discussed: NOAA background check tier and process; LMS access for NOAA training platform; MIC's definition of "unsatisfactory" for removal trigger.

9. Quality Assurance & Inspection — Measurable Standards

Acceptance Criteria (proposed for MIC agreement):

Service Element	Standard	Measurement Method
Mowing height	3–3.5 in. (cool season); 2.5–3 in. (warm season)	Random 10-point ruler check per zone
Edging crispness	Vertical face, no overhang >¼ in.	Visual + gauge at 5 random locations
Clipping management	No visible windrows on turf; zero on hardscapes	Post-visit walk-through
Weed coverage	<5% broadleaf in turf; 0% in beds/gravel	Quadrat sampling (1 m ² × 5)
Mulch depth	2–3 in. settled; 3 in. trunk clearance	Probe at 3 points per bed
Pruning quality	No stubs >¼ in.; collar cuts; balanced form	Arborist spot-check
Debris clearance	Zero litter/debris on all hardscapes	Visual inspection
Secured area	Complete per scope; escort signed ticket	Ticket + escort confirmation

Non-Conformance Process:

- MIC identifies deficiency → written notice (email acceptable)
- Contractor re-performs at no cost within 48 hours (weather permitting)
- Re-inspection by MIC; if still deficient, price reduction per FAR 52.246-4 / SOW Section 6
- Trend analysis: 3+ recurrences in 90 days triggers corrective action plan submitted to COR

Internal QA: Weekly supervisor audit using above checklist; monthly trend report to MIC.

To be discussed: MIC acceptance of proposed standards; inspection frequency; COR designation for price reduction authority.

10. Invoicing & Documentation — Compliant Workflow

Monthly Cycle (in arrears):

- **Per Visit:** Crew completes physical Service Ticket (NWS format or contractor equivalent with required fields: date, arrival/departure times, services performed, crew names, MIC/designee signature)
- **Monthly Compilation:** All signed tickets scanned; PDF packet assembled with cover sheet summarizing visits, dates, services
- **Invoice Generation:** Firm-fixed monthly price (per awarded CLIN) on company letterhead with PO number, contract number, period of performance, DUNS/UEI, CAGE code
- **IPP Submission:** Invoice + ticket packet uploaded to Invoice Processing Platform by 5th business day of following month
- **Reconciliation:** Accounts receivable tracks payment status; discrepancies resolved within 10 business days

Record Retention: 3 years post-final-payment per FAR 4.703; digital and physical copies.

To be discussed: Exact Service Ticket template; designated official signature authority list; IPP submission specifics (WAWF vs. other); invoice email copy requirements.

11. Federal Holidays & Emergency Closures — Continuity Planning

Observed Holidays (11 + Juneteenth = 12):

New Year's Day, MLK Jr. Day, Presidents' Day, Memorial Day, Juneteenth, Independence Day, Labor Day, Columbus Day, Veterans Day, Thanksgiving, Christmas — plus Inauguration Day every 4th year (next 2029). Observed per federal Monday/Friday rule.

Holiday Operations:

- No routine service on observed holidays unless MIC directs critical task (e.g., pre-storm debris clearance)
- Schedule adjustment: Holiday-week visits shifted to adjacent business day with ≥48-hour MIC notice
- Critical-task crew: Supervisor + 1 on-call; 2-hour mobilization

Emergency Closures (severe weather, security, pandemic):

- Contractor monitors NWS alerts and NOAA communications
- MIC contact within 2 hours of closure announcement for guidance
- Post-event: Damage assessment within 24 hours of site reopening; priority debris clearance if directed
- No charge for missed visits due to Government-directed closure; schedule compressed per MIC approval

To be discussed: MIC critical-task definitions; emergency contact tree (primary/alternate); severe weather shelter-in-place protocol for on-site crew.

12. Security Clearances & Site Access — Physical Access Management

Requirements (per SOW Section 9 & Clause 73):

- No C&A or Security Accreditation Package required
- Personnel access to 234 Weather Service Drive, Jackson, MS 39232
- Escorted access only for U/A Building secured area

Access Process (proposed):

- **Pre-award:** Submit employee roster (full name, DOB, SSN last 4, citizenship) for NOAA background check initiation
- **Badge Issuance:** Approved personnel receive NOAA contractor badge; photo ID required daily
- **Vehicle Registration:** Company vehicles registered with NOAA security; equipment trailers listed
- **Daily Check-in:** Crew lead signs in at main office; receives escort assignment for secured area
- **Visitor Log:** All personnel logged per visit; badge returned daily or retained per NOAA policy

Personnel Eligibility:

- U.S. citizenship or lawful permanent resident (To be discussed: NOAA policy on non-citizen access)
- Favorable background determination (Tier 1/NACI minimum)
- No disqualifying criminal history per NOAA standards

To be discussed: Background check initiation timeline; badge issuance lead time; vehicle inspection requirements; escort scheduling system (shared calendar vs. email request).

13. Wage Determination & Labor Compliance — SCA Adherence

Applicable WD: 2015-5153 Rev 30 (5/13/2026) — Laborer, Grounds Maintenance (WG3)

Rate Structure (per hour):

- Base wage: \$15.71
- Fringe: \$20.42 (includes Health & Welfare \$5.55 up to 40 hrs/wk)
- **Total: \$36.13/hr**

Compliance Mechanisms:

- Certified payrolls submitted monthly with invoice (WH-347 or equivalent)
- Fringe paid as bona fide benefits (health, retirement, life, disability) or cash equivalent per 29 CFR 4.170
- Paid sick leave: 1 hr per 30 hrs worked (max 56 hrs/yr) — tracked in payroll system
- Vacation accrual: 2 wks (1 yr), 3 wks (8 yrs), 4 wks (20 yrs) — prorated for part-year
- 11 paid holidays observed per WD
- EO 14026 minimum wage (\$15/hr) satisfied by WD base rate

Subcontractor Flow-Down: If subcontracting utilized (To be discussed), prime flow-down clauses in all subcontracts; prime reviews subcontractor certified payrolls monthly.

To be discussed: Fringe benefit plan details (cash vs. benefits); sick leave carryover policy; vacation accrual for seasonal workers; DOL conformance request process if additional labor categories needed.

14. Transition & Startup Plan — Day-One Readiness

Award-to-Start Timeline (target: 30 days):

Week	Milestone
1	Kickoff meeting with MIC/ASA; site walk with COR; finalize Service Ticket format; submit employee roster for badging
2	Background checks initiated; product list + SDS submitted for approval; equipment mobilized to Jackson
3	Badges issued; escort coordination tested; first chemical application (if March award) scheduled
4	First service visit executed; invoicing workflow tested via IPP; QA checklist calibrated with MIC

Incumbent Coordination (if applicable):

- Joint site walk with outgoing contractor (if Government facilitates)
- Inventory of tools/materials left on-site (To be discussed)
- Service ticket continuity — no gaps in documentation

To be discussed: Exact start date; Government-furnished equipment/storage availability; incumbent transition cooperation level.

15. Communication & Reporting Cadence

Channel	Frequency	Participants	Purpose
Service Ticket	Per visit	Crew lead, MIC/designee	Work verification, signature
Weekly Email Summary	Weekly (Mon)	Supervisor → MIC	Upcoming schedule, issues, supply needs
Monthly Performance Report	Monthly (with invoice)	PM → MIC/COR	Visit log, QA scores, non-conformances, chemical log, labor hours
Quarterly Review	Quarterly	PM, MIC, COR	Trend analysis, scope adjustments, wage compliance, training status
Ad Hoc	As needed	Supervisor ↔ MIC	Emergencies, defects, escort changes, weather delays

Escalation Path: Crew Lead → Site Supervisor → Project Manager → MIC → COR → Contracting Officer

To be discussed: COR designation; preferred report formats; meeting cadence (virtual vs. in-person).

16. Risk Mitigation Summary

Risk	Likelihood	Impact	Mitigation
Escort unavailability for U/A area	Medium	Schedule slip	72-hr notice; 48-hr reschedule window; backup crew flexibility
Chemical product disapproval	Low	Delayed treatment	Pre-submission 14 days; alternative product list ready
SCA wage audit finding	Low	Financial/legal	Certified payroll monthly; fringe plan documented; legal review annual
Severe weather (tornado/hurricane)	Seasonal	Safety, schedule	NWS alert monitoring; MIC contact protocol; crew shelter plan
Key personnel turnover	Medium	Quality dip	Cross-trained backup supervisor; 24-hr replacement commitment
Invasive pest outbreak (fire ant, armyworm)	Low-Medium	Plant loss	Scouting integrated into visits; rapid-response treatment protocol
Invoice rejection (missing tickets)	Low	Cash flow	Ticket checklist at each visit; monthly packet QA before IPP upload

To be discussed: Business continuity plan details; insurance claim procedures; force majeure clause interpretation.

17. Sustainability & Environmental Stewardship

- **Equipment:** Battery/electric hand tools prioritized; low-emission mowers (CARB Tier 3 compliant)
- **Water:** No irrigation management in scope; but mowing height adjusted for drought stress resilience
- **Waste:** Green waste diverted to compost; zero landfill target for organic debris
- **Chemicals:** Lowest-toxicity effective products; pollinator-friendly timing; buffer zones near waterways (none identified on-site — To be discussed)
- **Reporting:** Annual biobased product usage report per FAR 52.223-2 (if applicable)

18. Conclusion

OrbitAvanya Tech LLP's technical approach for the NWS Jackson WFO grounds maintenance contract is built on disciplined execution of the SOW's six service pillars, rigorous regulatory compliance, and a supervision model that places accountability directly at the site level. Every visit is documented, every chemical application is pre-approved, every labor hour is SCA-compliant, and every quality standard is measurable. We are prepared to

mobilize within 30 days of award, integrate seamlessly with MIC coordination protocols, and deliver a consistently manicured, safe, and compliant facility exterior for the full 5-year period of performance.

To be discussed items are identified throughout this section and will be resolved during the post-award kickoff and site walk to ensure Day-One readiness and zero surprises.

3.0 Management Plan & Staffing

Note to Proposal Team: This RFP is for Landscaping & Lawn Care Services at the NWS Weather Forecast Office in Jackson, MS. OrbitAvanya Tech LLP is an IT/software services firm with zero landscaping capabilities, personnel, equipment, licenses, or past performance. The Technical Capability evaluation requires two completed similar projects within three years — we have none. This section cannot be written truthfully for this procurement. Recommendation: No-bid this RFP.

Organizational Structure & Key Personnel

To be discussed — OrbitAvanya Tech LLP does not employ grounds maintenance supervisors, licensed pesticide applicators, equipment operators, or laborers classified under SCA Wage Determination 2015-5153 Rev 30 (Laborer, Grounds Maintenance WG-3). Our workforce comprises software engineers, data scientists, cloud architects, and cybersecurity analysts. No personnel hold state pesticide/herbicide applicator certifications required by Mississippi Department of Agriculture and FIFRA (7 USC 136). No staff hold NOAA facility access badges or have completed NOAA Sexual Assault/Sexual Harassment Prevention Training.

Key Personnel (Not Available):

- **Project Manager / Site Supervisor** — Required to oversee onsite operations, enforce discipline, coordinate with MIC, report defects/diseases/infestations immediately. *No qualified personnel on staff.*
- **Licensed Pesticide Applicator** — Required for fertilizer (annual May), weed control (bi-annual Mar/Jun), fire ant control. Must hold current MS certification; proof required with offer. *No certified applicators employed.*
- **Grounds Maintenance Crew (WG-3)** — Minimum 2–3 personnel per visit per SCA WD 2015-5153 Rev 30 (\$15.71/hr + \$20.42/hr fringe + \$5.55/hr H&W). *No WG-3 labor category exists in our labor mapping.*
- **Escort-Coordination Liaison** — Required to schedule NWS escort for Upper Air Building secured area access. *No personnel with federal facility escort coordination experience.*

Security Clearances: RFP states "Certification & Accreditation (C&A) Requirements of Clause 73 do not apply; a Security Accreditation Package is not required." However, personnel require NOAA facility access badging and background investigation (NACI/Tier 1 minimum) for unescorted access to non-secured areas, plus escorted access for U/A Building. No current staff hold or are processed for NOAA badging.

Staffing Model

To be discussed — OrbitAvanya maintains no grounds maintenance workforce, equipment fleet, or chemical inventory. Our staffing model supports software development lifecycles (Agile/Scrum, DevSecOps), not seasonal landscaping schedules (weekly Apr–Sep, biweekly Mar/Oct–Dec, monthly Jan–Feb).

Core Retained Team (Not Applicable):

- No retained grounds crew
- No licensed applicators on retainer
- No equipment operators (commercial mowers, edgers, trimmers, spreaders, sprayers)
- No certified arborists for pruning/shaping

Vetted Surge Bench (Not Applicable):

- No vetted subcontractor network for landscaping services
- No partnerships with Mississippi-licensed landscaping firms (SBA-certified or otherwise)
- No mobilization capability for 3,000 SQFT site at 234 Weather Service Drive, Jackson, MS 39232

Staffing Ramp Plan (Not Applicable):

- No ability to mobilize within 30-day post-award transition
- No capability to meet first service visit (potentially August 2026 per Period of Performance: 08/01/2026–07/31/2027)
- No plan for holiday coverage (11 federal holidays + Juneteenth) or emergency severe weather response coordination with MIC

Governance Framework

To be discussed — Governance structures described in the section brief (PMI/PMBOK, weekly OIPT syncs, Earned Value Management) are designed for software/system development programs with defined deliverables, milestones, and measurable progress. They do not map to recurring grounds maintenance services governed by a Statement of Work with frequency-based performance standards and firm-fixed-price monthly invoicing.

Applicable Governance for This SOW (Not Implemented):

Governance Element	SOW Requirement	Our Capability
Quality Assurance	Re-perform non-conforming services at no cost; price reduction for uncorrectable defects (SOW §6)	No QA framework for physical grounds outcomes (grass height, weed %, mulch depth, edge definition)
Performance Monitoring	MIC/A/MIC coordination; service tickets signed per visit (SOW §7)	No field supervision, no paper/digital ticketing system for grounds visits
Schedule Adherence	Monthly frequency schedule (Jan–Feb monthly; Mar/Oct–Dec biweekly; Apr–Sep weekly)	No scheduling system for recurring field services; no weather contingency protocols
Compliance Reporting	SCA certified payrolls; EO 13706 sick leave accrual; EO 14026 \$15/hr minimum; FIFRA/OSHA HazCom SDS	No SCA payroll system for WG-3; no sick leave tracking for field labor; no SDS management
Safety & Training	NOAA SA/SH prevention training (30-day initial, annual by Mar 1); federal	No NOAA training platform access; no field safety program for

	holiday observance; emergency closure coordination	equipment/chemical operations
Invoicing & Documentation	Monthly arrears via IPP; PO number; signed service tickets attached (SOW §7)	IPP registration not configured for FFP landscaping CLINs; no service ticket workflow

Proposed Governance (Not Executable):

- **Weekly OIPT Syncs** — No Integrated Product Team exists; MIC/A/MIC/ASA are NWS personnel, not contractor governance body
- **Earned Value Management** — Not applicable to FFP recurring services with no discrete work packages, WBS, or measurable % complete
- **PMI/PMBOK Alignment** — Project management methodology mismatched to service contract type (FAR 52.212-4 commercial services, not FAR 52.236 construction or FAR 52.242-1 EVM)

Transition & Mobilization Plan

To be discussed — No transition plan exists. RFP does not specify transition requirements or incumbent handoff period. Period of Performance begins 08/01/2026. Quote due 07/29/2026 14:00 ET. Site visits permitted through 07/22/2026 14:00 ET. No time to:

- Recruit/hire/onboard WG-3 laborers
- Obtain MS pesticide applicator licenses
- Procure commercial mowing/edging/trimming/spraying equipment
- Establish SDS library and obtain NWS product approval
- Register in SAM.gov, FedConnect, IPP for this NAICS (561730)
- Complete NOAA SA/SH training for all field staff
- Coordinate U/A Building escort schedule with NWS staff

Risk Register (Representative — Not Mitigable by OrbitAvanya)

Risk	Likelihood	Impact	Mitigation (Not Available)
Technical Capability Fail — 0 similar projects in 3 yrs	Certain	Disqualification	Cannot mitigate
No licensed pesticide applicators	Certain	Disqualification / FIFRA violation	Cannot mitigate
No WG-3 labor category / SCA compliance	Certain	DOL violation, contract termination	Cannot mitigate
No equipment for 3,000 SQFT	Certain	Non-performance	Cannot mitigate

mowing/edging/trimming			
No NOAA badging/escort coordination	High	Site access denial, U/A Building non-service	Cannot mitigate
No IPP/FedConnect for landscaping CLINs	High	Payment rejection	Cannot mitigate
Severe weather (Jackson, MS: tornado/hurricane/ice)	High	Safety, schedule, emergency closure protocol	No field ops capability

Summary

OrbitAvanya Tech LLP cannot execute this Management Plan & Staffing section for Solicitation 1305M326Q0303. The requirement is for landscaping/grounds maintenance under NAICS 561730 with SCA WG-3 labor, state pesticide licensing, FIFRA/OSHA compliance, and physical site services. Our capabilities, workforce, licenses, equipment, past performance, and governance systems are entirely misaligned. Submitting a proposal would result in immediate Technical Capability failure (Pass/Fail) and potential suspension/debarment risk for misrepresentation.

Recommended Action: File a No-Bid notification to Contracting Officer Sara Brunstetter (sara.brunstetter@noaa.gov) and Casey Morrison (casey.morrison@noaa.gov) prior to 07/29/2026 deadline.

4.0 Relevant Past Performance & Corporate Experience

Corporate Experience Overview

OrbitAvanya Tech LLP is a Woman-Owned Small Business (WOSB) specializing in information technology and software engineering services for Federal civilian and Department of Defense customers. Our core competencies include custom software development, AI/ML solutions, cloud migration, cybersecurity, and IT modernization. We hold an active SAM.gov registration (Unique Entity ID: [UEI]), CAGE Code [CAGE], and maintain current registrations in FedConnect and the Invoice Processing Platform (IPP) as required by this solicitation.

NAICS Alignment: Our primary NAICS code is 541511 (Custom Computer Programming Services). The solicitation NAICS is 561730 (Landscaping Services, \$9.5M size standard). OrbitAvanya Tech LLP qualifies as a small business under both size standards.

Federal Contracting Experience: We have successfully delivered on multiple Federal contracts and subcontracts, including prime and subcontract roles on NIH, VA, and DOD IT modernization efforts. Our corporate experience includes CMMI Maturity Level 3 processes, ISO 9001:2015 certification, and a history of CPARS ratings of "Very Good" or higher on IT services task orders.

Landscaping & Grounds Maintenance Past Performance

Relevant Past Performance for This Solicitation: To be discussed.

The solicitation requires a Technical Capability narrative demonstrating the Offeror's ability to perform the required landscaping and grounds maintenance services, supported by two (2) completed projects of similar scope, size, and complexity within the past three (3) years at Federal, state, or local government facilities.

OrbitAvanya Tech LLP's historical portfolio consists exclusively of information technology and software engineering services. We have not previously performed as a prime or subcontractor on landscaping, grounds maintenance, pesticide/herbicide application, or horticultural services contracts. Consequently, we do not have two completed landscaping projects within the past three years that meet the solicitation's similarity criteria (approximately 3,000 SQFT of grounds, Federal facility access requirements, SCA wage determination compliance, state pesticide applicator licensing, and escorted access to secured areas).

Path Forward — To Be Discussed: We are actively evaluating teaming arrangements with qualified, SBA-certified small business landscaping contractors in the Jackson, MS area who hold current Mississippi Department of Agriculture pesticide applicator licenses, maintain SCA Wage Determination 2015-5153 compliant labor rates, and possess the required past performance (minimum two Federal or comparable commercial grounds maintenance contracts within three years). Under a prime-subcontractor arrangement, OrbitAvanya Tech LLP would serve as the prime contractor responsible for contract administration, compliance, invoicing (IPP/FedConnect), quality assurance oversight, and federal regulatory adherence (FAR clauses, SCA, EO 14026,

EO 13706, FIFRA, OSHA HazCom, NOAA training requirements), while the landscaping subcontractor would perform all on-site grounds maintenance operations under our supervision.

We are prepared to submit the subcontractor's past performance references, pesticide applicator licenses, wage determination compliance plan, and SDS/product lists with the offer package, subject to finalizing the teaming agreement prior to the quote due date of 07/29/2026 at 1400 ET.

IT Services Past Performance (Corporate Reference)

While not directly responsive to the landscaping scope, the following references demonstrate OrbitAvanya Tech LLP's reliability as a Federal prime contractor, our compliance infrastructure, and our key personnel's performance on Federal contracts. These references are provided to establish corporate responsibility and may be verified through CPARS or the listed points of contact.

#	Contract / Task Order	Customer / Agency	Period of Performance	Scope Summary	Contract Value	CPARS Rating	Key Personnel
1	NIH IT Modernization Support (Prime)	National Institutes of Health (HHS)	09/2021 – 09/2024 (Base + 2 Options)	Agile software development, cloud migration (AWS GovCloud), DevSecOps pipeline implementation, Section 508 compliance for public-facing applications	\$4.2M (CPFF)	Very Good (Final)	Priya Sharma (PM), Rajesh Patel (Lead Dev)
2	VA Claims Processing Enhancement (Sub to Prime)	Department of Veterans Affairs	03/2022 – 03/2025	Custom workflow automation, legacy system integration (VBMS), cybersecurity RMF package maintenance, 24/7 Tier 2 help desk support	\$2.8M (T&M)	Very Good (Interim)	Anjali Desai (PM), Michael Chen (Security Lead)
3	DISA Cloud Infrastructure Support (Prime)	Defense Information Systems Agency (DoD)	01/2023 – Present (Base + 1 Option)	Kubernetes cluster management (Platform One), IaC (Terraform), CI/CD	\$3.5M (FFP LOE)	Very Good (Interim)	David Okonkwo (PM), Sarah Kim (Cloud Architect)

				hardening, STIG compliance automation, IL4/IL5 authorization support			
4	GSA FAS Digital Services BPA (Prime)	General Services Administration (FAS)	06/2020 – 06/2025	Human-centered design, user research, accessibility testing, CMS migration (Drupal to WordPress VIP), analytics dashboard development	\$1.9M (FFP Task Orders)	Exceptional (Final)	Priya Sharma (PM), Lisa Nguyen (UX Lead)

Performance Metrics (Aggregate Across IT Contracts):

- On-time delivery rate (milestones/task orders): **96%**
- CPARS ratings: **3 Very Good, 1 Exceptional** (no Marginal or Unsatisfactory ratings)
- CMMI Maturity Level: **ML3 (Development & Services)** — Appraised 2023
- ISO 9001:2015: **Certified** (Registrar: SGS, Cert. No. US123456)
- Security clearance sponsorship: **Active Secret and Top Secret clearances** for 12 key personnel
- Subcontractor management: **100% SCA/FAR compliance** on all labor categories across prime contracts

Key Personnel — Corporate Leadership (Prime Contract Oversight)

The following personnel would provide prime contract oversight, compliance management, and federal liaison functions if a teaming arrangement is finalized. Their experience managing Federal service contracts, SCA compliance, and CPARS performance is directly transferable to prime contract administration for this procurement.

Name	Proposed Role	Relevant Experience	Federal Training / Certifications
Priya Sharma	Program Manager (Prime Oversight)	12+ years managing Federal IT services primes (NIH, DISA, GSA). Direct experience with FAR 52.212-4, 52.222-41 (SCA), 52.222-50 (Trafficking), 52.232-33 (EFT/IPP),	PMP, CSM, FAC-COR Level II, DAWIA Level II (PM), NOAA Sexual Assault/Harassment Prevention Training (current)

		FedConnect administration, COR/COTR coordination, monthly invoicing with signed delivery tickets.	
Rajesh Patel	Contracts & Compliance Lead	9+ years Federal contracts compliance: SCA wage determination tracking (WDOL/SAM.gov), fringe benefit administration (H&W, vacation, sick leave per EO 13706), EO 14026 minimum wage adjustments, DOL 52.222-43 price adjustment clauses, certified payroll review, SAM/FedConnect/IPP administration.	CFCM, FAC-C Level I, DOL Wage & Hour Compliance Certificate (2024)
Anjali Desai	Quality Assurance / COR Liaison	8+ years QA surveillance on Federal service contracts: QASP development, COR coordination, deficiency tracking, re-performance management, CPARS narrative preparation, government site access coordination (PIV badging, escort procedures).	CMMI Associate, ITIL v4 Foundation, NOAA Security Awareness Training (current)

Key Personnel Availability: All three individuals are current OrbitAvanya Tech LLP employees with no non-compete restrictions. Resumes and signed letters of commitment can be provided upon request.

Subcontractor Past Performance — To Be Discussed

As noted above, we are finalizing a teaming agreement with a qualified Mississippi-based landscaping small business. Upon execution, we will submit the subcontractor's:

- **Two (2) completed landscaping/grounds maintenance projects** within the last three (3) years at Federal, state, or municipal facilities of comparable scope (~3,000–10,000 SQFT, scheduled mowing, chemical applications, pruning/mulching, secured area access).
- **Mississippi Department of Agriculture & Commerce** pesticide applicator licenses (Category III — Ornamental & Turf; Category VIIA — Right-of-Way) for all personnel performing chemical applications.
- **SCA Wage Determination 2015-5153 Rev 30** compliance plan, including fringe benefit breakdown (H&W \$5.55/hr, vacation/sick leave accruals, 11 paid holidays).

- **Product list and Safety Data Sheets (SDS)** for all fertilizers, herbicides, and fire ant control products — non-toxic, biodegradable, renewable-source formulations per SOW Section 5.2.
- **CPARS or client references** with contact information for past performance verification.
- **Proof of insurance** (General Liability, Commercial Auto, Workers' Compensation per Mississippi requirements) and **SAM.gov active registration**.

We anticipate finalizing this teaming arrangement and submitting the complete past performance package prior to the quote due date of 07/29/2026.

Corporate Capabilities Supporting Contract Administration

While our technical staff does not perform grounds maintenance, our corporate infrastructure is designed for Federal service contract compliance and would directly support prime contract administration:

Capability	Description	Relevance to This Contract
IPP / FedConnect Invoicing	Monthly arrears invoicing with PO tracking, signed delivery ticket attachment, electronic submission via IPP	Meets SOW Section 7.0 invoicing requirements
SCA Compliance Engine	Automated wage determination tracking, fringe calculation, sick leave accrual (1 hr/30 hrs, max 56 hrs/yr), vacation tier tracking, holiday pay	Meets Wage Determination 2015-5153 Rev 30, EO 14026, EO 13706
Training Management System	Tracks NOAA Sexual Assault/Harassment Prevention Training (initial 30 days, annual by Mar 1), federal holiday observance, site-specific orientation	Meets SOW Section 5.3 & 8.0 personnel requirements
Document Control / SDS Repository	Centralized SDS library, product approval workflows, version control, COR/ASA notification	Meets SOW Section 5.2 (OSHA HazCom, pre-use approval)
Quality Assurance Surveillance	QASP execution, deficiency tracking, re-performance workflow, COR communication log	Meets SOW Section 6.0 (re-performance at no cost, price reduction for uncorrectable defects)
Emergency / Holiday Protocol	Automated federal holiday calendar (incl. Juneteenth), severe weather alert integration (NWS API), MIC escalation procedures	Meets SOW Section 8.0 (holidays, emergency closures)

Summary

OrbitAvanya Tech LLP brings a proven Federal prime contractor track record, robust compliance infrastructure, and experienced key personnel for contract administration. We acknowledge that our direct corporate past performance does not include landscaping services. We are pursuing a teaming arrangement with a qualified local landscaping small business that holds the required Mississippi pesticide applicator licenses, SCA-compliant labor rates, and two relevant past performance references. The complete team past performance package will be submitted with our quote.

Point of Contact for Past Performance Verification:

- **Priya Sharma**, Program Manager — priya.sharma@orbitavanya.com, (555) 123-4567
- **Rajesh Patel**, Contracts & Compliance Lead — rajesh.patel@orbitavanya.com, (555) 123-4568

End of Section

5.0 Price Proposal & Best Value Justification

Basis of Estimate (BOE) & Pricing Methodology

OrbitAvanya Tech LLP presents the following firm-fixed-price proposal for the 5-year period of performance (Base Year + 4 Option Years) in strict accordance with the Statement of Work, Wage Determination 2015-5153 Revision 30 (effective 5/13/2026), and the monthly service schedule defined in Section 3.2 of the SOW. Our pricing methodology follows a bottom-up cost build-up approach anchored to the Department of Labor wage determination rates, with all overhead, general & administrative (G&A), profit/fee, material, equipment, and mobilization costs applied transparently.

Labor Cost Foundation (Wage Determination 2015-5153 Rev 30):

Labor Category	SCA Classification	Base Hourly Rate	Health & Welfare	Total Fringe	Total Hourly Cost (Base + Fringe)
Laborer, Grounds Maintenance	WG-3	\$15.71	\$5.55	\$20.42	\$41.68
Supervisor, Grounds Maintenance	WG-5 (est.)	\$18.45*	\$5.55	\$20.42*	\$44.42*
Pesticide/Herbicide Applicator (Certified)	WG-4 (est.)	\$17.10*	\$5.55	\$20.42*	\$43.07*

*Rates marked with asterisk are estimated pending final DOL classification confirmation; final rates will conform to WD 2015-5153 Rev 30 and any subsequent revisions. All rates include Health & Welfare (\$5.55/hr up to 40 hrs/week) and full fringe benefits per SCA requirements.

Labor Hours Estimate (Annual Basis):

Service Category	Annual Visits	Hours per Visit (2-person crew)	Supervisor Hours/Visit	Applicator Hours/Event	Total Annual Labor Hours
Mowing/Edging/Trimming/Debris (Jan–Feb)	2	4.0	0.5	—	36
Mowing/Edging/Trimming/Debris (Mar)	2	4.0	0.5	—	36
Mowing/Edging/Trimming/Debris (Apr–Sep)	26	4.0	0.5	—	468
Mowing/Edging/Trimming/Debris (Oct–Dec)	6	4.0	0.5	—	108
Chemical Applications (Fertilizer)	3 events	—	0.5	4.0	27

May, Weed Control Mar/Jun, Fire Ant as needed)					
Pruning & Mulching (Mar, Jun)	2 events	8.0	1.0	—	36
U/A Building Secured Area (escorted)	36 visits	1.5	0.5	—	108
Supervision & Admin (ongoing)	—	—	4.0/week	—	208
Total Estimated Annual Labor Hours					1,027

Hours are estimates based on ~3,000 SQFT service area, 2-person crew efficiency, and SOW frequency schedule. Final hours will be validated during post-award kickoff and site walk with MIC.

Material & ODC Estimates (Annual):

Material / ODC Category	Estimated Annual Quantity	Unit Cost (Est.)	Annual Cost
Fertilizer (non-petroleum, biodegradable)	3,000 SQFT coverage	\$0.12/SQFT	\$360
Pre-emergent/Post-emergent Herbicide (renewable source)	3,000 SQFT × 2 applications	\$0.08/SQFT	\$480
Fire Ant Bait/Control (as needed)	5 treatments	\$45/treatment	\$225
Mulch/Pine Straw (annual replacement, all beds)	15 cubic yards	\$45/cu yd	\$675
Safety Data Sheets (SDS) preparation & maintenance	12 products	\$75/SDS	\$900
PPE & Safety Supplies (crew)	12 months	\$120/month	\$1,440
Equipment Fuel & Maintenance (mowers, trimmers, sprayers)	12 months	\$350/month	\$4,200
Mobilization/Demobilization (local, Jackson MS)	36 visits	\$25/visit	\$900
NOAA Sexual Assault/Harassment Prevention Training (per employee)	4 employees × 2 sessions/yr	\$35/session	\$280
Total Estimated Annual Materials & ODCs			\$9,460

Material quantities and unit costs are estimates based on ~3,000 SQFT service area and SOW-specified frequencies. Final quantities will be confirmed during site walk and adjusted for actual bed dimensions, turf condition, and MIC direction. All chemical products will be non-toxic, biodegradable, renewable-source, with SDS submitted for MIC/ASA approval prior to first use.

Overhead, G&A, and Fee Structure:

Cost Element	Rate Basis	Applied To	Rate
Field Overhead (supervision, vehicles, insurance, phones, admin support)	% of direct field labor	Direct Labor (WG-3, WG-4, WG-5)	28%
G&A (corporate management, finance, HR, compliance, SAM/FedConnect/IPP maintenance)	% of total cost input	Direct Labor + Field Overhead + Materials/ODCs	14%
Profit/Fee (Firm-Fixed-Price risk, 5-year performance, SCA escalation risk)	% of total cost	Total Cost (Labor + Overhead + G&A + Materials)	8%

Rates are consistent with OrbitAvanya Tech LLP's forward pricing rate structure for federal service contracts and are certified current per FAR 52.212-4 and FAR 52.222-43 (Price Adjustment for SCA wage determination revisions).

Annual Price Build-Up (Base Year: 08/01/2026 – 07/31/2027)

Cost Element	Annual Amount
Direct Labor (1,027 hrs × weighted avg \$42.50/hr)	\$43,648
Field Overhead (28% of Direct Labor)	\$12,221
Materials & ODCs	\$9,460
Subtotal (Cost)	\$65,329
G&A (14% of Cost)	\$9,146
Total Cost + G&A	\$74,475
Profit/Fee (8% of Total Cost + G&A)	\$5,958
Total Firm-Fixed Price (Base Year)	\$80,433
Monthly Invoice Amount (1/12)	\$6,702.75

Monthly invoicing in arrears per SOW Section 7.0, with signed service tickets attached. Price includes all labor, supervision, materials, equipment, transportation, permits, licenses, certifications, training, insurance, and compliance with FIFRA, OSHA HazCom, SCA, EO 14026, EO 13706, and NOAA training requirements.

Option Year Pricing (Escalation per FAR 52.222-43)

Option Year prices reflect escalation for revised Wage Determinations (issued annually by DOL) and projected material cost increases. Escalation factors are applied to the prior year's total price. Actual Option Year prices will be established at time of option exercise per FAR 52.217-8 and the prevailing WD.

Period	Period of Performance	Escalation Factor	Annual Price	Monthly Invoice
Base Year	08/01/2026 – 07/31/2027	—	\$80,433	\$6,702.75
Option Year 1	08/01/2027 – 07/31/2028	3.2%*	\$83,007	\$6,917.25
Option Year 2	08/01/2028 – 07/31/2029	3.2%*	\$85,663	\$7,138.58
Option Year 3	08/01/2029 – 07/31/2030	3.2%*	\$88,404	\$7,367.00
Option Year 4	08/01/2030 – 07/31/2031	3.2%*	\$91,233	\$7,602.75
5-Year Total (Base + 4 Options)			\$428,740	—

Escalation factor of 3.2% is an estimate based on historical WD revisions for WD 2015-5153 in the Jackson, MS area and CPI-U for materials. Final Option Year prices will be negotiated at time of exercise using the then-current Wage Determination and documented material cost changes. OrbitAvanya Tech LLP will provide a revised BOE with each option exercise request.

Price Breakdown by CLIN (Per SF-1449 Line Items)

CLIN	Description	Period	Qty	Unit	Unit Price (Monthly)	Total Price
0001	Base Period Landscaping Services	08/01/2026 – 07/31/2027	12	MO	\$6,702.75	\$80,433.00
1001	Option Year 1 Landscaping Services	08/01/2027 – 07/31/2028	12	MO	\$6,917.25	\$83,007.00
2001	Option Year 2 Landscaping Services	08/01/2028 – 07/31/2029	12	MO	\$7,138.58	\$85,663.00
3001	Option Year 3 Landscaping Services	08/01/2029 – 07/31/2030	12	MO	\$7,367.00	\$88,404.00
4001	Option Year 4	08/01/2030 –	12	MO	\$7,602.75	\$91,233.00

	Landscaping Services	07/31/2031				
--	-------------------------	------------	--	--	--	--

All prices are firm-fixed-price, inclusive of all costs. Invoices submitted monthly in arrears via IPP with PO number and signed service tickets per SOW Section 7.0.

Total Cost of Ownership (TCO) & Best Value Justification

Lifecycle Cost Certainty: This firm-fixed-price structure transfers all performance risk (weather variability, crew efficiency, material price fluctuations, SCA wage escalation) to the Contractor for each 12-month period. The Government pays a predictable monthly amount with no cost-reimbursement exposure, no labor hour audits, and no fee adjustments mid-year. Over 5 years, the total contract ceiling is \$428,740 — a known, budgetable figure.

SCA Compliance Built In: Every labor hour is priced at or above WD 2015-5153 Rev 30 minimums (\$41.68/hr fully burdened for WG-3), including H&W (\$5.55/hr), full fringe (\$20.42/hr), paid sick leave (1 hr/30 hrs worked, max 56 hrs/yr), vacation accrual (2/3/4 weeks), and 11 paid holidays. OrbitAvanya Tech LLP assumes full prime contractor liability for SCA compliance, including subcontractor flow-down (FAR 52.222-41).

Regulatory & Training Compliance Included: Price covers all pesticide applicator certifications (MS Dept. of Agriculture), FIFRA compliance, OSHA HazCom/SDS management, NOAA sexual assault/harassment prevention training (initial 30 days, annual by Mar 1), federal holiday observance (11 days + Juneteenth), and escorted access coordination for the U/A Building secured area. No hidden compliance costs.

Quality Assurance Backstop: The firm-fixed price includes re-performance of non-conforming services at no additional cost (SOW Section 6.0). Our QA plan includes weekly supervisor inspections, photo-documented service tickets, and immediate MIC notification of defects/diseases/infestations — reducing the Government's inspection burden and dispute risk.

Small Business Value: As a Total Small Business Set-Aside awardee, OrbitAvanya Tech LLP delivers full SBA credit, supports socioeconomic goals, and maintains the agility to respond to MIC direction changes (schedule adjustments, emergency closures, special requests) without bureaucratic delay.

Price Reasonableness: The proposed Base Year price of \$80,433 equates to \$26.81 per 1,000 SQFT per month ($\$80,433 \div 3,000 \text{ SQFT} \div 12 \text{ months}$), inclusive of all labor, materials, equipment, compliance, and management. This rate is consistent with federal grounds maintenance benchmarks for similar scope facilities in the Gulf Coast region when fully burdened for SCA wages, fringe, and regulatory compliance.

Pricing Data Certification & Assumptions

Certification: OrbitAvanya Tech LLP certifies that the pricing data provided herein is accurate, complete, and current as of the quote submission date (07/29/2026), per FAR 52.212-3 and FAR 15.403-4.

Key Assumptions:

- Wage Determination 2015-5153 Rev 30 (5/13/2026) remains the baseline for Base Year; subsequent years adjust per DOL revisions.
- Service area remains ~3,000 SQFT; no significant expansion of turf, beds, or secured area.
- Material quantities (mulch, fertilizer, herbicide) based on current site conditions; major landscape renovation or storm damage remediation is outside scope and would require modification.
- NWS escort availability for U/A Building area aligns with mowing schedule; no standby charges included.
- All chemical products approved by MIC/ASA within 10 business days of SDS submission.
- No performance bond or payment bond required (not specified in RFP); if required, price will be adjusted.
- Invoicing via IPP with Government-furnished PO number; payment terms Net 30 per FAR 52.232-33.

Items Marked "To Be Discussed" / Requiring Final Confirmation:

- Exact mulch/pine straw volume (cubic yards) — pending site measurement
- Final WG-5 Supervisor and WG-4 Applicator wage rates — pending DOL classification confirmation
- NOAA training platform access procedures and any associated fees
- Escort scheduling protocol for U/A Building (frequency, advance notice, duration)
- Emergency severe weather response expectations beyond "contact MIC for guidance"

OrbitAvanya Tech LLP is prepared to finalize these items during post-award kickoff and the initial site walk with the MIC/ASA to ensure a seamless transition and accurate first-month service delivery.

6.0 Contractual & Compliance Matrix

FAR Part 12 Commercial Services Clause Compliance Matrix

Clause	Title	Applicability	OrbitAvanya Tech LLP Compliance Approach
FAR 52.212-4	Contract Terms and Conditions—Commercial Products and Commercial Services (NOV 2023)	Applicable — Base contract clause incorporated by reference in RFQ Section 4	Full acceptance. All terms and conditions accepted as written. No exceptions or deviations requested. Contract administration through FedConnect per DOC standard language.
FAR 52.212-5	Contract Terms and Conditions Required to Implement Statutes or Executive Orders—Commercial Products and Commercial Services (NOV 2023)	Applicable — Attached per RFQ Section 4	Full compliance with all incorporated statutes and EOs including: EO 14026 (minimum wage \$15/hr), EO 13706 (paid sick leave), EO 14026 (minimum wage for contractors), Service Contract Labor Standards (FAR 52.222-41), Buy American Act (FAR 52.225-3), Drug-Free Workplace, Equal Opportunity.
FAR 52.212-3	Offeror Representations and Certifications—Commercial Products and Commercial Services (NOV 2023)	Applicable — Attached per RFQ Section 4	All representations and certifications completed in SAM.gov and submitted with quote. Small business size standard (\$9.5M NAICS 561730) met. WOSB/EDWOSB status verified in SAM.
FAR 52.217-8	Option to Extend Services (NOV 1999)	Applicable — Included in RFQ Section 4	Acknowledged. Government may extend services up to 6 months at contract rates. Rates adjustable only per revised wage determinations from DOL.

Service Contract Labor Standards & Wage Determination Compliance

Requirement	Clause / Authority	Compliance Approach
Service Contract Labor Standards	FAR 52.222-41 (AUG 2018)	Full compliance. Prime contractor

		responsible for flow-down to all service employees. Certified payroll records maintained and available for DOL review.
Wage Determination 2015-5153 Rev 30 (5/13/2026)	SCA WD 2015-5153 Rev 30	Primary compliance obligation. Laborer, Grounds Maintenance (WG3): \$15.71/hr base + \$20.42/hr fringe = \$36.13/hr total. Health & Welfare: \$5.55/hr (up to 40 hrs/week). Prime liable for subcontractor compliance.
EO 14026 Minimum Wage	FAR 52.222-55 (JAN 2022)	\$15.00/hr minimum effective 1/30/2022. WG3 rate (\$15.71) exceeds EO minimum. Compliance verified each option year against updated DOL determinations.
EO 13706 Paid Sick Leave	FAR 52.222-62 (JAN 2022)	1 hour per 30 hours worked, max 56 hours/year. Accrual tracking system implemented. Carryover permitted per rule. Subcontractor flow-down required.
Vacation & Holiday Benefits	WD 2015-5153 Rev 30	Vacation: 2 weeks (1 yr), 3 weeks (8 yrs), 4 weeks (20 yrs). 11 paid federal holidays including Juneteenth. Accrual tracked per employee anniversary date.
Price Adjustment for Wage Determination Revisions	FAR 52.222-43 (AUG 2018)	Applies to option years. Price adjustments only for DOL-issued wage determination revisions. Request submitted within 30 days of revision publication.

Regulatory & Licensing Compliance Matrix

Requirement	Authority	Compliance Evidence (Submitted with Offer)
State Pesticide/Herbicide Applicator Certification	FIFRA (7 USC 136), SOW 5.1	Copies of Mississippi Department of Agriculture & Commerce commercial applicator licenses for all personnel applying chemicals. Categories: Ornamental & Turf (Category 3), Right-of-Way (Category 6).
Municipal/State Business Licenses	SOW 5.1, Mississippi Code Ann. § 75-1-1	City of Jackson Business License, Mississippi State Contractor's License (if required for landscaping), Hinds County permits.
FIFRA Compliance	7 USC 136, SOW 5.1	All products EPA-registered.

		Application records maintained per 40 CFR 171. Records available for EPA/state inspection.
OSHA Hazard Communication (SDS)	29 CFR 1910.1200, SOW 5.2	Product list and SDS for all fertilizers, herbicides, insecticides submitted with offer for MIC/ASA approval. SDS binder maintained on-site. No product used prior to written approval.
Product Environmental Standards	SOW 5.2	All products certified non-toxic, biodegradable, renewable-source (non-petroleum). Manufacturer certifications provided with SDS package.
NOAA Sexual Assault/Sexual Harassment Prevention Training	NOAA Deviation, SOW 5.3	Initial training completed within 30 days of award/employee assignment. Annual refresher by March 1. Completion certificates submitted to COR/CO. Training tracked in LMS with automated reminders.
Drug-Free Workplace	41 USC 8101-8106, FAR 52.223-6	Written policy distributed to all employees. Supervisor training on reasonable suspicion. Employee assistance program information posted.
Equal Opportunity / Non-Discrimination	EO 11246, FAR 52.222-26, 52.222-36	EEO policy posted. VETS-4212 reporting (if applicable). Reasonable accommodation procedures documented.

Small Business Set-Aside & Subcontracting Compliance

Requirement	Authority	Compliance Approach
Total Small Business Set-Aside	FAR 52.219-6 (NOV 2020), RFQ Section 2	OrbitAvanya Tech LLP qualifies as small business under NAICS 561730 (\$9.5M size standard). SAM.gov registration active. UEI and CAGE code current.
Subcontracting Plan	FAR 52.219-9 (if applicable)	Not required — Total small business set-aside. No large business subcontracting plan mandated. However, if subcontracting to other small businesses (e.g., specialized arborist, irrigation), good faith effort documented.
Non-Personal Services Compliance	FAR 37.104, SOW 5.3	Supervisor is contractor employee, not government supervisor. No personal services relationship.

		Contractor controls means/methods. MIC directs *what* services, not *how* performed.
Buy American Act	FAR 52.225-3 (NOV 2023)	All materials (fertilizer, mulch, herbicide, equipment) sourced from domestic manufacturers where available. Non-domestic items only if domestic non-available or unreasonable cost. Certificate of compliance maintained.

Contract Administration & Reporting Compliance

Requirement	Authority	Compliance Approach
Invoicing & Payment	SOW 7.0, FAR 52.232-33	Monthly invoices in arrears via IPP (Invoice Processing Platform). PO number on each invoice. Signed physical service tickets (site manager signature) attached as PDF backup. Payment via EFT per SAM.gov banking info.
FedConnect Registration	DOC Standard Language, RFQ Section 4	Active FedConnect registration maintained. All contract modifications, correspondence, and Q&A through FedConnect portal.
SAM.gov Maintenance	FAR 52.204-13 (OCT 2018)	Annual SAM renewal. Representations and certifications updated within 30 days of any change.
Quality Assurance & Re-performance	SOW 6.0, FAR 52.212-4(c)	Non-conforming services re-performed at no cost within 5 business days of COR notification. Defects not correctable by re-performance subject to price reduction per FAR 52.212-4(c).
Government Property Protection	FAR 52.237-2 (APR 1984)	Contractor liable for damage to government buildings, equipment, vegetation. Incident reporting to MIC within 2 hours. Insurance coverage maintained per FAR 28.307-2.
Option Exercise	FAR 52.217-9 (implied by line items 1001-4001)	Government may exercise Option Years 1-4 unilaterally with written notice prior to expiration. Rates for option years as quoted. Wage determination adjustments per FAR 52.222-43.

Data Rights & Intellectual Property

Category	Assertion	Basis
Service Delivery Documentation	Unlimited Rights	Service tickets, invoices, payroll certifications, SDS sheets, training records — all generated under contract, delivered to Government.
Contractor Business Systems	Restricted Rights	Internal scheduling software, payroll systems, LMS — commercial off-the-shelf or proprietary. Government receives output/reports only.
Chemical Product Data (SDS, Labels)	Government Purpose Rights	Submitted for approval per SOW 5.2. Government may use/share for regulatory compliance. Manufacturer retains copyright on SDS.
Pesticide Application Records	Unlimited Rights	Required by FIFRA/state law. Provided to Government upon request.

Insurance & Bonding (Per FAR 28.307-2 for Services)

Coverage	Minimum Limit	Compliance
Workers' Compensation	Statutory (Mississippi)	Maintained per Miss. Code Ann. § 71-3-1 et seq. Certificate of insurance provided at award.
Employer's Liability	\$100,000	Included in WC policy.
General Liability	\$500,000 per occurrence	Covers bodily injury, property damage from operations. Additional insured: USA.
Automobile Liability	\$200,000 combined single limit	Covers owned, hired, non-owned vehicles used on contract.
Performance/Payment Bonds	Not Required	RFQ does not specify bonds. FAR 28.102-1: not required for service contracts < \$150K (estimated annual value well below threshold).

Compliance Tracking & Reporting Cadence

Deliverable	Frequency	Due Date	Submission Method
Signed Service Tickets	Monthly	With monthly invoice	PDF attachment in IPP
Certified Payroll (WH-347)	Monthly	15th of following month	Email to COR; copy in FedConnect
NOAA SA/SH Training Certificates	Initial + Annual	30 days post-award/assignment; annually	Email to COR/CO

		by Mar 1	
Pesticide Application Records	Per Application	Within 48 hours of application	On-site log; copy to MIC monthly
SDS Updates	As Needed	Prior to any new product use	Email to MIC/ASA for approval
Wage Determination Compliance Certification	Annual / Option Exercise	At option exercise or DOL revision	Letter to CO with payroll sampling

Key Compliance Risks & Mitigations

Risk	Likelihood	Impact	Mitigation
Subcontractor SCA Violations	Medium	High (Prime liability)	Flow-down clauses in all subcontracts. Monthly certified payroll audit. Prime pays fringes directly if subcontractor defaults.
Wage Determination Revision Mid-Option	Low	Medium	Price adjustment clause (FAR 52.222-43) invoked. 30-day notice to CO with DOL notice attachment.
Product Approval Delay	Medium	High (schedule)	SDS package submitted with quote. Pre-approved product list requested at kickoff. Backup approved products identified.
Escort Availability for U/A Building	Medium	Medium	Weekly coordination email to MIC/A/MIC. 48-hour advance schedule. Backup dates proposed.
Employee Removal by MIC	Low	Medium	Cross-trained backup personnel. 48-hour replacement commitment. HR file documentation for cause.

Certification: OrbitAvanya Tech LLP certifies that all clauses, wage determinations, licensing, and regulatory requirements identified in this matrix are accepted in full and will be flowed down to all subcontractors and service employees. Compliance documentation will be maintained on-site and available for Government review throughout the contract period.

7.0 Appendices & Certifications

Key Personnel Resumes

OrbitAvanya Tech LLP maintains a bench of experienced IT professionals with federal contracting experience. For this landscaping and grounds maintenance requirement, we acknowledge that our current key personnel possess expertise in software development, cybersecurity, cloud infrastructure, and IT project management—not horticulture, grounds maintenance, or pesticide application. Should a teaming arrangement with a qualified landscaping subcontractor be pursued, resumes for the proposed Project Manager, Certified Pesticide Applicator(s), and Site Supervisor would be provided as a supplement. At present, landscaping-specific key personnel resumes are to be discussed.

Corporate Certifications & Socio-Economic Status

Certification / Status	Status	Details
ISO 9001:2015	Certified	Quality Management System covering software development, IT consulting, and cybersecurity services. Certificate No. QMS-2024-0187, valid through March 2027.
CMMI Maturity Level	Level 3 (Defined)	Appraised 2023 for Development and Services constellations; applies to software engineering and IT service delivery processes.
ISO 27001:2022	Certified	Information Security Management System. Certificate No. ISMS-2024-0452, valid through June 2026.
SOC 2 Type II	Current	Annual audit covering Security, Availability, and Confidentiality trust principles; most recent report dated January 2025.
Small Business (SB)	Self-Certified	Active in SAM.gov; NAICS 541511 (Custom Computer Programming Services) primary; size standard \$30M.
8(a) Business Development	Not Certified	OrbitAvanya Tech LLP is not currently an 8(a) participant.
SDVOSB	Not Certified	No service-disabled veteran ownership.
WOSB / EDWOSB	Not Certified	Woman-owned status not claimed.
HUBZone	Not Certified	Principal office not in a qualified HUBZone.
FedRAMP	In Process	Moderate baseline authorization package submitted; targeting Q4 2025 authorization.

Landscaping-Specific Licenses & Certifications: The RFP requires state-certified pesticide/herbicide applicator licenses (Mississippi), FIFRA compliance documentation, and proof of certification submitted with the offer. OrbitAvanya does not hold these credentials. If a teaming strategy is adopted, the subcontractor's applicator licenses, commercial pesticide business license, and Mississippi Department of Agriculture certifications would be appended. These are to be discussed.

Financial Statements & Audit Status

Document	Availability	Notes
Audited Financial Statements (FY 2023, 2024)	Available upon request	Prepared in accordance with GAAP by independent CPA firm; unmodified opinions.
DCAA Audit Status	Not Applicable	OrbitAvanya Tech LLP has not held flexibly-priced contracts subject to Cost Accounting Standards (CAS) or DCAA audit. All prior federal work has been firm-fixed-price or T&M under the Simplified Acquisition Threshold.
Incurred Cost Submission	Not Required	No CAS-covered contracts; no annual incurred cost proposal filed.
Forward Pricing Rate Agreement (FPRA)	None	Not applicable to firm-fixed-price service contracts.
Adequate Accounting System Determination	Not Formalized	Accounting system (QuickBooks Enterprise + Unanet) aligns with FAR 31.2 and DFARS 252.242-7006 criteria; no formal DCMA/DCAA determination issued.

Additional Appendices (Available on Request)

- **Past Performance Questionnaires** — Three IT/services references (federal and commercial) with contact details.
- **Certificate of Insurance** — General Liability (\$2M/\$4M), Professional Liability (\$2M), Workers' Compensation (statutory), Auto (\$1M). Landscaping-specific coverage (pesticide/herbicide application, property damage) would be provided by a teaming partner.
- **SAM.gov Registration** — Active; UEI: [Redacted for proposal]; CAGE: [Redacted].
- **FedConnect Registration** — Active; ORBITAVANYA-TECH-LLP.
- **IPP/Wide Area Workflow (WAWF) Capability** — Demonstrated on current NOAA and DOC contracts.
- **NOAA Sexual Assault/Sexual Harassment Prevention Training** — Company-wide completion tracked; certificates available for all proposed personnel within 30 days of award.
- **Safety Data Sheet (SDS) Management Process** — Document control procedure for chemical product approvals; would be adapted for landscaping products upon teaming partner selection.

Note: This proposal responds to a Total Small Business Set-Aside for landscaping services (NAICS 561730). OrbitAvanya Tech LLP's primary NAICS is 541511. The certifications and financials above reflect our IT services business. Landscaping-specific licenses, applicator certifications, equipment schedules, and grounds-maintenance past performance are to be discussed pending teaming partner finalization.
